AURENOEVA

PROCUREMENT · COMPONENTS · INTELLIGENCE

Trusted sourcing for parts, equipment and procurement opportunities.

Based in Germany, AURENOEVA connects buyers with qualified sources and supports long-term relationships built on trust.

What we do

AURENOEVA operates an online parts catalogue where customers can search and enquire for components and technical products. We also receive direct RFQs from potential customers. We identify suitable sources, gather the relevant supplier information and provide these findings to the customer. The customer purchases directly from the source, while AURENOEVA receives a commission from the source.

How the process works

1. Online catalogue enquiry or RFQ received
2. AURENOEVA identifies and qualifies sources
3. Supplier information and options provided to the customer
4. Customer purchases directly from the source
5. AURENOEVA receives a commission and builds a long-term relationship

Why AURENOEVA

- Germany-based sourcing support
- Qualified supplier identification
- Direct customer–source purchasing model
- Trust-based long-term relationships
- Efficient handling of catalogue enquiries and RFQs
